

Craisebrook Cove Public Realm Rectification Plan – Ideas Plan

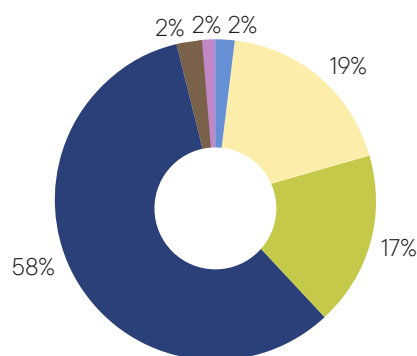

A City of Perth survey was undertaken in April 2023 to seek the community's feedback on priority improvement items, proposals for the Greenway Stream and additional questions and feedback.

The results of the survey will help in the development of the Craisebrook Cove Public Realm Rectification Plan, a plan to improve site

function, amenity and access for residents, businesses and visitors.

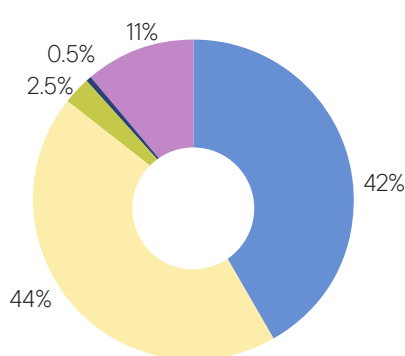

The survey was posted on Engage Perth from 19 April – 3 May, 2023 and the City received a total of **189 responses**. Additionally five (5) people or groups wrote into InfoCity to provide feedback on the plan.

Q1.
WHAT IS YOUR RELATIONSHIP
WITH CLAISEBROOK COVE?

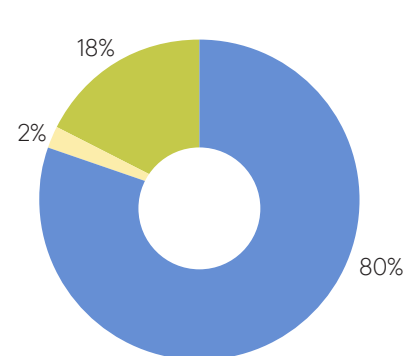

- I work there
- Regular visitor
- Property owner
- Local resident
- Business owner
- Other (please specify)

Q2.
WHAT NEIGHBOURHOOD
DO YOU LIVE IN?

- East Perth
- Craisebrook
- Central Perth
- Crawley/Nedlands
- Other (please specify)

Q3.
DO YOU SUPPORT THE
IDEAS PLAN?

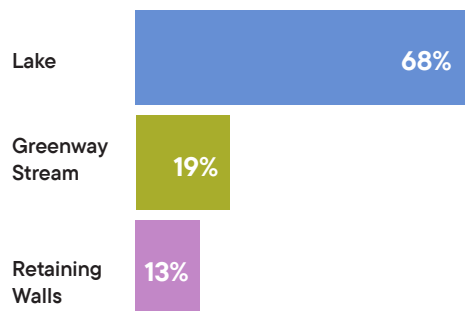

- Yes
- No
- Partially (if so, please specify which elements you support)

INFRASTRUCTURE IMPROVEMENTS

RANKED #1 PRIORITY

A total of **88 comments** were received explaining why the rankings were given. Key themes are summarised below:

- Cleanliness of lake due to algae, poor water quality, bad odour and bird droppings
- Poor functionality of lake and Greenway Stream due to shallow depth, poor water flow and leaf litter
- Designs must consider the environmental overlay within the lake e.g. bird and animal habitat
- Underutilised area surrounding lake needs activation

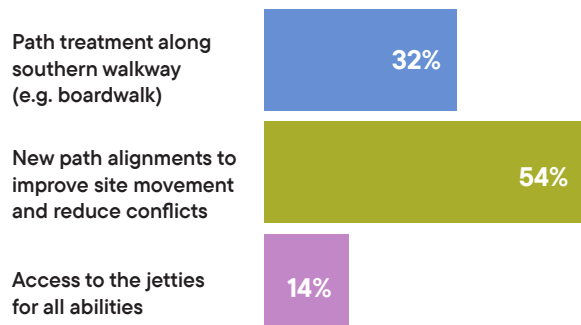

The stream is often not running and dries up and is full of rubbish

Claisebrook Lake is under-utilised and algae a significant issue

The lake is home to many species of bird life. It is important to maintain it for them.

ACCESS IMPROVEMENTS

RANKED #1 PRIORITY

A total of **75 comments** were received explaining why the rankings were given. Key themes are summarised below:

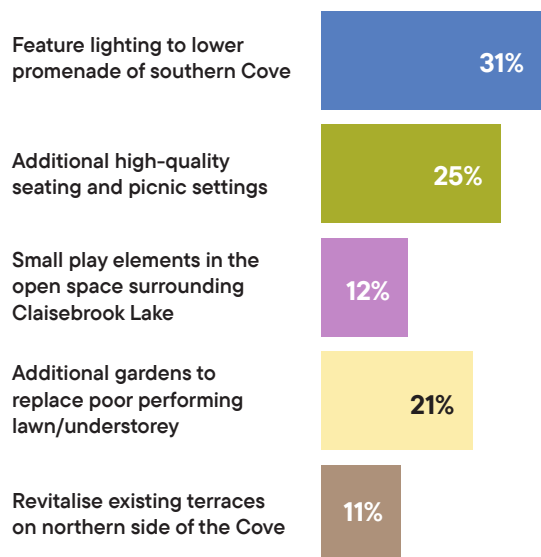

- Conflicts between pedestrians and cyclists/e-rideable's needs resolution due to safety
- Safety of pathways due to levels, uneven paving, tree roots
- Southern walkway currently in poor condition and needs a solution

Conflicts between pedestrians, cyclists and joggers is a main issue

The walkway on the south of the Lake is in a very bad state of repair with tree roots causing the main issues

Jetties are used by a very small percentage of the community

AMENITY IMPROVEMENTS

A total of **51 comments** were received explaining why the rankings were given. Key themes are summarised below:

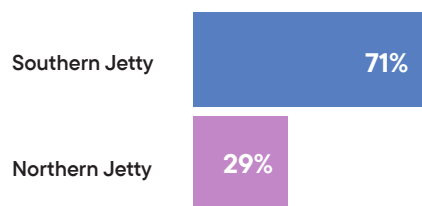

- Mixed support for increasing site use and activation vs others not wanting the Cove to become noisy and crowded
- Mixed support for play element with roughly 50/50 split supportive and unsupportive
- General support for feature lighting noting it should not impact residents or create glare

Improve usability around Claisebrook Lake

Lighting is a must for continued safety

JETTIES

RANKED #1 PRIORITY

A total of **76 comments** were received explaining why the rankings were given. Key themes are summarised below:

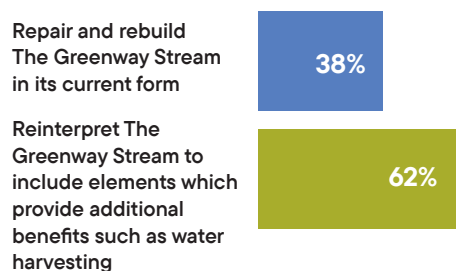

- Southern jetty supports surrounding businesses and is closest to activation
- Southern jetty is more accessible for elderly and people with disability.

North jetty barely used

South jetty closest to activation

THE GREENWAY STREAM

RANKED #1 PRIORITY

A total of **72 comments** were received explaining why the rankings were given. Key themes are summarised below:

- Odour, cleanliness, algae and poor existing flow need to be addressed
- Additional benefits generally supported particularly water harvesting and treatment
- Retain art elements in the reinterpretation
- Don't change it too drastically

If it's just rebuilt in its current form, you'll end up with the same problem that's there now

It would be great to include additional benefits such as water harvesting and treatment

I love the turtles. Please keep them, but improvements to keep it cleaner and working all year round would be great.

I hope the simplicity of the stream design is maintained and not lost
