

New Street Trees

Urban Forest Infill Street Tree Planting Program 2022

As part of the Urban Forest Plan the City of Perth will be planting new street trees across the city between April and October 2022 with the aim of:

- Filling gaps within existing street tree planting
- Helping to cool streets
- Improving green links
- Beautifying neighbourhood streets
- Promoting community health and well-being.

Which tree species will be planted?

Street tree species are determined by the City of Perth Street Tree Guide. In general, new planting will match the existing tree species most commonly found within each street.

Information on which tree has been selected for planting within a particular street as part of the current tree planting program can be found at engage.perth.wa.gov.au

When will planting take place?

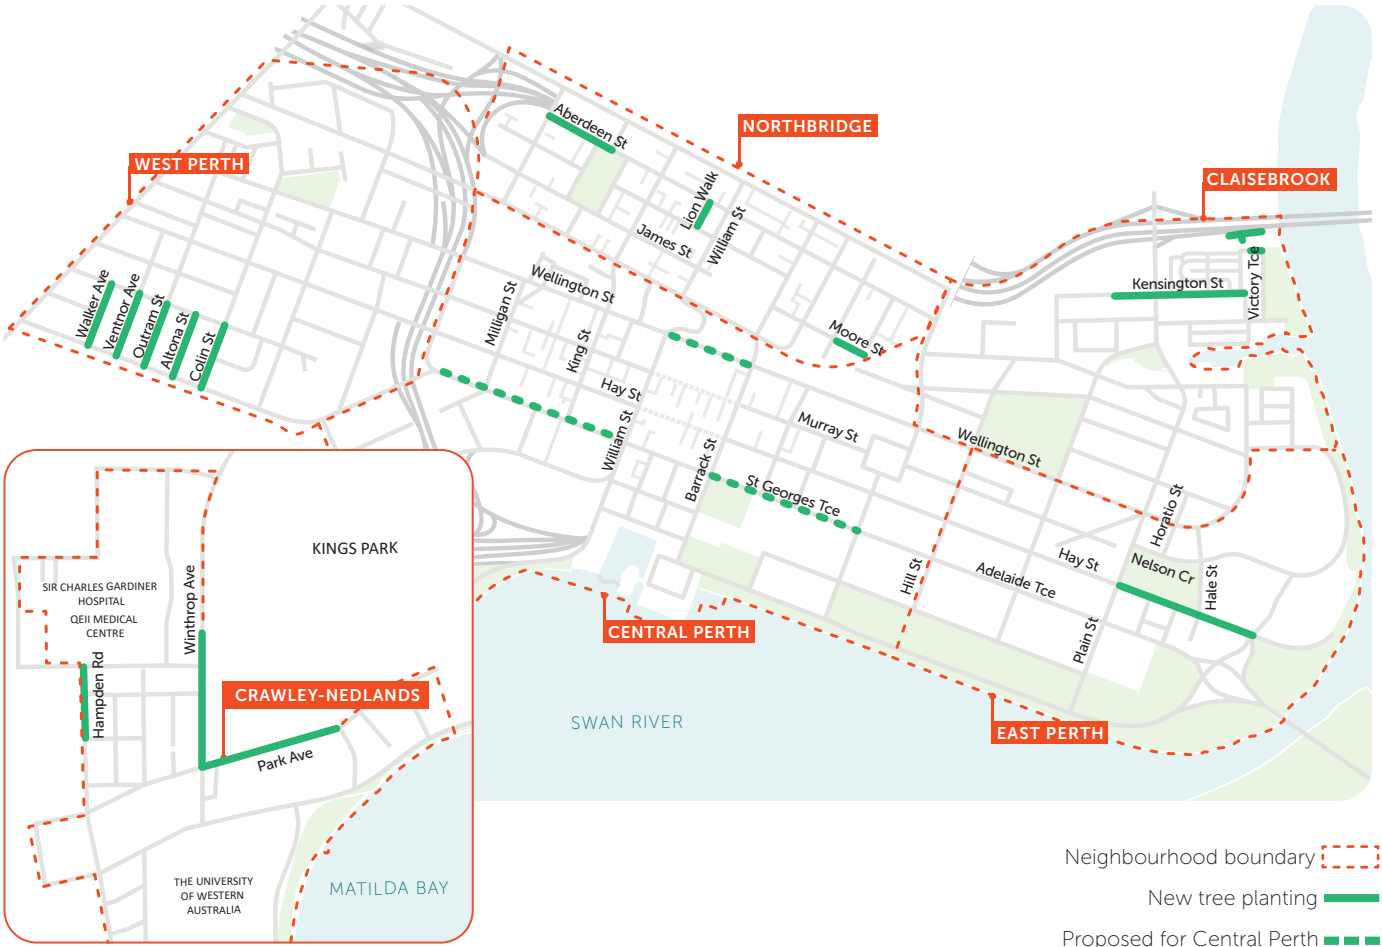

To maximise successful tree establishment and growth new trees are planted during the cooler months (April to October).

In some instances, site investigation works may take place prior to tree planting to locate underground services and test soils.

What to expect?

This work is generally low impact and the City aims to minimise disruption to adjoining residents and businesses during planting of new street trees.

CITY OF PERTH MAP

Where will you be planting?

Northbridge

- Lion Walk
- Aberdeen Street
- Moore Street

Central Perth

- St Georges Terrace
- Wellington Street

Crawley-Nedlands

- Hampden Road
- Park Avenue
- Winthrop Avenue

East Perth

- Hay Street (between Plain and Braithwaite)

Claisebrook

- Victory Terrace
- Kensington Street

West Perth

- Walker Avenue
- Ventnor Avenue
- Outram Street
- Altona Street
- Colin Street

Collaboration with Kings Park

This year's planting on Park Avenue in Crawley-Nedlands is the result of a successful collaboration between the City of Perth and Kings Park and Botanic Garden.

The new street trees have been grown up by the City, from seed stock provided by Kings Park. This will help ensure the genetic integrity of the existing tree population in Kings Park.

WALGA Urban Canopy Grant Program

The City of Perth successfully applied for funding to help plant new trees on Moore Street in Northbridge.

The planting site is located in one of the City's main temperature hot spot areas and has a low level of canopy cover. It is next to Perth Children's Court and the Fremantle to Perth Principal Shared Path; an important pedestrian and cycle route through the city.

Increased shade from the new trees as they mature, will help create a more comfortable and inviting space for the community to use and encourage people to walk and cycle in the city.

How can I help?

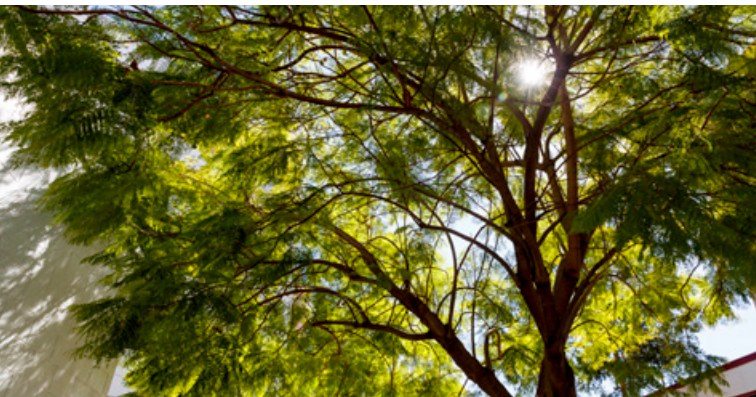

The City of Perth is responsible for all trees planted within city streets. To maximise success each tree is given additional care and management for the first three years after planting. This includes watering once to twice a week during the spring, summer and autumn months.

The role of the community is important. You can assist the City by letting us know if trees are struggling or have been damaged, and by carrying out additional watering during the summer months. Please apply water directly to the base of the tree to give it the best chance of survival.

Where can I find out more?

More information about new tree planting and the City of Perth Urban Forest Plan can be found at: ***engage.perth.wa.gov.au***
