Dear Residents and Businesses

URBAN FOREST- NEW STREET TREE PLANTING

In September 2016, Council adopted the *City of Perth Urban Forest Plan* to deliver a range of benefits for our community including improved amenity and liveability, landscape character, biodiversity, and climate resilience.

As part of the Plan's ongoing infill street tree planting project, the City of Perth undertakes new tree planting between April and October annually in each of the City's six neighbourhoods as follow:

Grass verge areas:

The works will require small areas of existing garden bed and/or hardstand to be removed and a tree pit dug. A new tree will then be installed with new soil and mulch to help support it.

Paved footpath areas:

The works will require small areas of existing paving to be removed and a tree pit dug. A new tree will then be installed with new soil. At the completion of the works, the pavers will be reinstated and the site swept clean.

The work is generally low impact and the City aims to minimise disruption to adjoining residents and businesses during planting. Each new street tree will be hand watered once to twice a week during the spring, summer and autumn months, for the first five years after planting.

If you have any queries, please contact Customer Experience on 9461 3333. Key planting dates can be found by visiting the Urban Forest project page at engage.perth.wa.gov.au

Yours sincerely
