

Residents and Businesses
Spring Street and Mount Street
Perth

Dear Residents and Businesses

SPRING STREET AND MOUNTS BAY ROAD CONNECTION PROJECT

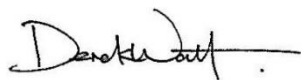

The Perth CBD Transport Plan is a \$157 million investment to improve public transport accessibility and safety in the CBD, increasing the attractiveness and sustainability of the city for residents and visitors. The Perth CBD Transport plan is a part of the \$1.5 billion Perth City Deal investment which is being delivered by the Australia and Western Australian governments in partnership with the City of Perth. The Spring Street and Mounts Bay Road Connection has been designed in close collaboration and assistance of the Department of Transport and Mainroads WA.

Construction of the Spring Street and Mounts Bay Road Connection is anticipated to begin in June 2023, and scheduled to be completed by mid-2023. The project aims to improve cycling connectivity between Mounts Bay Road and Mount Street, as well as reduce traffic congestion. Updates on this project can be found on the City's Engage Perth website www.engage.perth.wa.gov.au/spring-street-and-mounts-bay-road-connection. An indicative map of the project is provided on the next page.

As this project may affect pedestrian, cycle, and vehicle traffic, construction updates relating to path and road closures will be provided on the Engage Perth link above.

If you wish to contact the City or provide feedback on this project, please visit the Engage Perth website or contact Derek Watt via email Derek.Watt@cityofperth.wa.gov.au or phone (08) 9461 3207.

Yours sincerely

Derek Watt
