

Dear Stakeholder

As part of the Roe Street Enhancement Project, Civcon will be commencing the upgrade of critical infrastructure which includes large scale and complex works to cater for the City's growth.

On behalf of City of Perth, Western Power will be commencing construction activities on Roe Street between King and Melbourne Streets from 23 to 26 May 2022 to install required service provision.

What will the impacts be?

- Closure of eastbound and westbound movements on Roe Street (between King and Melbourne Streets). While road closure will be in place, access to driveways and pedestrian crossings will be maintained and pedestrian and traffic management detours will be in place via Melbourne Street for the duration of the work. Please ensure you follow the traffic controllers on site for access.
- Construction noise.
- Footpath detours (business access will be maintained during normal working hours (7am – 5pm) or as required.
- Installation of temporary construction fencing.

Night Work

There will be a requirement to perform certain activities outside of normal working hours to:

- Reduce the impact on pedestrians
- Reduce the impact on businesses
- Provide a safe working environment for our personnel
- Temporary road/lane closures and detours.

Who to contact?

We are committed to working with stakeholders to minimise the impacts of this essential work and everything possible will be done to minimise disruption. While we will endeavor to complete the work as quickly as possible if you have any concerns, please refer:

- Civcon Senior Project Engineer – Marinko Knezovic – 0478 761 817
